### Objectives

Detail-oriented and results-driven Computer Engineering graduate with strong foundations in embedded systems and hardware-software integration. Experienced in tools such as Arduino, SAP, AutoCAD, and Bonitasoft, with solid knowledge of microprocessors, digital electronics, and computer architecture.

Alongside hardware expertise, I also specialize in software development—primarily front-end—with hands-on experience in building responsive, user-focused web interfaces. Proficient in modern technologies such as JavaScript, React, Next.js, Tailwind CSS, CSS, and version control using GitHub. Familiar with Node.js, Firebase, and Supabase for backend-as-a-service and API integrations, as well as Flutter for cross-platform mobile development.

I bring strong problem-solving abilities, adaptability, and a collaborative mindset, with a continuous focus on efficiency, clean UI/UX, and delivering innovative engineering solutions.
